WHO WE ARE
The Colorado State Fire Fighters Association has been serving the needs of Colorado firefighters and their respective communities since its inception in 1916. Originally started by five Colorado fire departments, the Colorado State Fire Fighters Association continuously grows in membership. Existing fire safety laws and ordinances throughout Colorado reflect the influence the Colorado State Fire Fighters Association has had with state and local lawmakers over the course of its history.

P U R P O S E
The purpose of this Association shall be to create and maintain a perpetual spirit of friendship between all firefighters, to meet and assemble in an Annual Fire College and to devise ways and means by which to improve fire fighting by:

- Discussion of topics
- Improvement of the fire service and members of the Association
- Promote and develop cooperation between the various fire service organizations and associations in the State of Colorado
- Interact with various State, Federal and local agencies affecting the fire and EMS programs
- To transact all lawful business for which the association has been incorporated, pursuant to Colorado Corporation Law and Codes

OBJECTIVES AND MISSION
The Colorado State Fire Fighters Association has an objective to host an Annual Fire College offering four-hour to twenty-four-hour courses to train and educate Firefighters to assure the safety of the firefighters and the lives they touch. In addition to the Fire College, the Colorado State Fire Fighters Association provides Outreach programs that certified trainers bring the classes to you for its members throughout the state upon request. Our training officer will design training for each department needs.

LEGISLATION
Legislation maintains the pension system for firefighters, retaining state funding levels for the volunteer without further loss or integrity of the laws. Workers Compensation, tax issues and firefighters health and safety are monitored to benefit members as well as nonmembers. It will provide the fire service with a direct communication to Federal and State Senators and Representatives for the needs of the fire service community.
